Achu Bhavan, Kattakodu.P.O, Tvm, Kerala

Linkedin : www.linkedin.com/in/achu-joseph-s-l-1809a9229

Expertise:

- Python
- JavaScript
- Django
- FastAPI
- Flask
- SQL
- React.js
- Redux
- Docker
- Kubernetes
- gRPC
- Microservices architecture
- Data structures
- ORM (Object-Relational Mapping)
- OOP (Object-Oriented Programming)
- Firebase
- Debugging (console, IDE)
- SOLID principles
- MVT (Model-View-Template) architecture
- Team leading and communication

Also Used:

- TypeScript
- Postman
- Tailwind CSS
- WordPress
- Figma
- JWT (JSON Web Tokens)
- MongoDB
- RabbitMQ
- Nginx
- AWS

Integrations:

- Razorpay
- Fast2SMS
- OAuth
- Cloudinary

Education Background

- G.VHSS Paruthypally
- Currently pursuing a BCA degree at Manipal University Jaipur with a focus on web development and computer science.

About Me

As a self-taught Full Stack Developer, I offer a wealth of experience in web development, from creating responsive frontend interfaces to developing scalable backend solutions. My expertise extends to various technologies and tools, ensuring the successful execution of complex projects. With a commitment to leadership and effective team communication, I am well-prepared to drive innovation and deliver high-quality solutions.

Professional Experience

Coding Bootcamp

December 2022 – Present

Key responsibilities:

- **Problem-Solving and Team Collaboration:**
Analyzed issues and effectively collaborated with teams to develop solutions, providing regular project progress updates and proposing solutions to address any challenges
- **Data Organization:**
Meticulously sorted and organized files, spreadsheets, and reports for efficient data management.
- **Continuous Learning and Knowledge Expansion:**
Actively participated in workshops and presentation-related projects to expand my knowledge and skillset.
- **Database Management:**
Collected, arranged, and input data into database systems with precision, ensuring data integrity and accuracy.
- **Leadership and Coordination:**
Demonstrated leadership by coordinating and leading teams to achieve project goals effectively.

Supplemented by ten months of intensive web development training from a prestigious coding bootcamp, I've evolved into a disciplined and highly adaptable professional with a proven track record of excelling in high-pressure environments, consistently committing 12-15 hours daily to my work.

Some Projects

Jo_Wellness (Doctor Appointment Booking Service with Social Media Features)

Technologies:

- Technologies such as Django Rest Framework, Flask, and FastAPI for robust backend development, alongside JWT, Kafka, and gRPC for secure and efficient communication. For frontend excellence, I employ React, Redux for state management, and utilize Tailwind CSS and Axios for stylish, responsive, and data-driven user interfaces.

Getorgi -ecom

Technical: Developed Getorgi-e-commerce using Django, MySQL, Razorpay, and PayPal, implementing MVT architecture, wallet system, variant selection, multi- image zoom, cropping, and comprehensive CRUD functionalities.

Overall: Created a robust e-commerce platform for organic vegetable sales, combining technical expertise with a user-friendly interface and comprehensive admin features

Git Repo - https://github.com/Achujozef/getorgi_ecom.git

Please note that this project is currently under development.

Description: In development, JoWellness is a single-page web app combining doctor appointments and social media features. Users can follow doctors, send messages, video call, like posts, and set diets. It integrates new and emerging technologies to suggest relevant feeds, promising a holistic wellness experience.
