PROFILE SUMMARY

A self-taught individual with strong multitasking abilities and a dedicated work ethic. Possesses effective teamwork, problem-solving and organizational skills. Willing to take on various responsibilities to support the team and known for being a reliable and committed collaborator with a diligent and resourceful approach.

TECHNICAL SKILLS

- **Frontend Skills** : React.js , Redux , HTML , CSS , JavaScript , Ajax , Tailwind , Bootstrap , Figma
- **Backend Skills** : Node.js , Express.js , MongoDB , RESTful API , MVC Architecture , MySQL
- **Integrations** : Multer , Firebase Verification , Razorpay , Fast2sms , Twilio , Sharp , Easy Invoice
- **Familiar with** : Git (Version Control) , AWS , Postman , Data Structures and Algorithms , OOPS

PROJECTS

Big Shopy - E-commerce Website

[Live Link](#) | [Git Repository](#)

- A algorithm-driven e-commerce platform integrates wishlist, cart, payment integration
- Employed **React** for front-end and integrated **Material UI** components to enhance the UI.
- Crafted **RESTful API** codes to establish seamless communication between the front-end and back-end.
- Utilizing **Node.js** on the backend, **Express.js** integration improved API response times by 20%.
- Ensured efficient and scalable data management by integrating **MongoDB Atlas**.

FoodZZone - E-commerce Website

[Live Link](#) | [Git Repository](#)

- Dynamic website with features including cart, wishlist, checkout, coupons, payment integration and returns.
- Leveraged **EJS** as the view engine and integrated **Bootstrap** to enhance user friendly UI.
- Employed **AJAX** for real-time data updates to enhance user experience.
- Utilized **Node.js** on the backend, optimizing API response time by 20% through the integration of **Express.js**.
- Integrated **MongoDB Atlas** as the cloud-based database for robust data management, ensuring efficient and scalable data handling.

Hinged - Wedding Management Website

[Live Link](#) | [Git Repository](#)

- Users can plan and book services like photographers , makeup etc for their wedding
- The application uses a combination of MVC and Clean architecture
- The back-end runs on Node js with further support of express js framework, Front-end using react js along with tailwind css.
- Utilized **Node.js**, **React js**, **MongoDB**, **Express.js**, **Redux toolkit**, **JWT**, **Tailwind** , **Socket Io**, **Nodemailer**, **Multer**, **Cloudinary**

MINI PROJECTS

Password Generator

[Live Link](#) | [Git Repository](#)

- Crafted and deployed a dynamic password generator application on **GitHub**.
- Built using **HTML5** and **CSS** for the user interface and utilizes **JavaScript** for generating passwords.
- The application allows users to generate passwords with specific lengths, And user can copy.

User Management

[Git Repository](#)

- Independently developed a dynamic user management application, Using **MongoDB** for database.
- The project features **EJS** for templating, **Bootstrap** for responsiveness, **Express.js** for server-side logic.
- The application is designed with a monolithic architecture to organize backend routes efficiently.

Goal Setter

[Git Repository](#)

- The project leverages **React.js** and **Redux** the front-end, **Node.js** for the back-end,
- Integrates **Express.js** for server-side handling, utilizes **MongoDB** and **Firebase** for data storage and seamlessly connects the two layers with API calls.

Olx Clone

[Git Repository](#)

- Created a responsive and functional clone of olx and deployed it on **GitHub**.
- Features including user can login and add product ads, Admin can handle all users at admin side.
- The frontend built using **React** with **Redux** and data handling using **MongoDB** and **Firebase**.
